ANUJA SAWANT

Software Engineer

Long Beach, CA | sawantanuja16@gmail.com | **562-391-1731** | GitHub | LinkedIn

EDUCATION

California State University, Long Beach | **M.S. Computer Science** *Jan 2025 – Dec 2026*

Relevant coursework: Advanced Software Engineering; Software Maintenance, Re-Engineering and Reuse

Terna Engineering College, University of Mumbai | **B.E. Computer Engineering** *2016 – 2020*

RESEARCH & PUBLICATIONS

Pynguin-MVP: Automated Test Generation for Lightweight Architectural Validation | IEEE ICSA-C 2026

- Co-authored a peer-reviewed IEEE paper evaluating automated test generation across three Python systems (30–85 tests per system; 62%–88% statement coverage).

DOI: 10.1109/ICSA-C68850.2026.00080

Exposing the Security Vulnerabilities of Generative AI | IEEE INTCEC 2025

- Examined generative AI security threats, including adversarial and prompt-injection risks, and approaches to mitigation.

DOI: 10.1109/INTCEC65580.2025.11255987

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C

Backend & Full-Stack: React, Vite, Node.js, Express.js, FastAPI, REST APIs, ASP.NET

Cloud & Enterprise: Microsoft Azure, Azure DevOps, CI/CD, Power Apps, Power Automate, SPFx, Git

Testing & ML: pytest, automated testing, pandas, NumPy, scikit-learn, Streamlit

PROFESSIONAL EXPERIENCE

Custom Software Engineering Analyst | **Accenture Solutions Pvt Ltd** *Jun 2023 – Dec 2024*

- Optimized Azure-based enterprise applications, improving load time by 20% through performance troubleshooting and code improvements.
- Developed Node.js backend services and REST APIs supporting 50+ users; collaborated with frontend teams on integration.
- Automated testing and deployment workflows with CI/CD pipelines, reducing manual operational effort by 30%.
- Supported enterprise applications and workflow automation across Microsoft cloud, Power Platform, and SPFx environments.

Application Development Associate | **Accenture Solutions Pvt Ltd** *Apr 2021 – May 2023*

- Maintained Azure DevOps CI/CD and release processes across development, staging, and production environments.
- Resolved 60+ production incidents, generally within 24 hours, through troubleshooting and root-cause analysis.
- Supported ASP.NET backend debugging, performance fixes, and release management for enterprise systems.

PROJECTS

Strategix | **Bank Campaign Intelligence Platform (team project)** *2026*

- Co-developed a React/Vite and FastAPI app using Random Forest predictions to prioritize term-deposit campaign leads.
- Built campaign decision-support features, including ranked leads, CSV export, ROI simulation, and model explainability; excluded post-call duration to prevent data leakage.

  Repository: github.com/answ19/Strategix_BankMarketAI

AI Request Monitor | **Prompt-Injection Screening Prototype** *2026*

- Created a FastAPI prototype for rule-based prompt-injection screening, request validation, and interpretable risk scoring.
- Added JSONL security-event logs, pytest-based tests, and a Streamlit interface for inspecting API results.

  Repository: github.com/answ19/ai-request-monitor

Pynguin-MVP | **Automated Unit Test Generation Tool** *2025*

- Built a Python test-generation tool with function discovery, pytest-compatible output, and automated coverage reporting.
- Created HTML result summaries to inspect generated tests and coverage gaps; extended the work through IEEE research.
